Telecom Operations Copilot

Search telecom SOPs or generate an AI explanation.

Try these questions:

- Why am I getting SMSC Timeout?
- Explain Error Code 005
- What causes DLT Template Mismatch?
- Explain Invalid MSISDN
- Why are my SMS failing?

Ask your telecom question

Why am I getting SMSC Timeout?

 Search SOP

 AI Explain

AI Explanation Generated Successfully!

Based on the system logs, here is the explanation for the error you are experiencing:

1. What the Issue Is (Error Code: 005)

You are receiving an **SMSC Timeout** status. This simply means that the Short Message Service Center (SMSC) did not respond.

2. Possible Causes

The SMSC failed to respond within the expected time because of:

- **Network congestion** (too much traffic on the network).
- **Temporary outages**.
- **Connectivity issues**.

3. How to Resolve It

- **Wait and Try Again:** Please retry sending your request after some time.

- **Check Connectivity:** If the issue continues to happen, check your operator or SMSC connectivity.
