Hello! As a Telecom Technical Support Engineer, I can help explain this issue.

1. Explanation of the Issue

A **DLT Template Mismatch** (Error Code: 003) is a high-severity issue. This error occurs because the actual message content you are trying to send does not

match the template that has been approved on the DLT platform.

2. Possible Cause

This issue is caused by one of the following:

- The message content, the template ID, or the variables do not match the DLT-approved template.

3. Suggested Resolution

To resolve this issue, you need to:

- Verify your template mapping and check the placeholders to ensure they align perfectly with the approved DLT template.
